- Fast learner
- Teamworking
- Leadership

LANGUAGES

- English (Fluent)
- Afrikaans (Fluent)

PROFILE

I am a 21-year-old ambitious student, currently studying Information Technology at the University of Eduvos. I matriculated in 2021 and I am excited to pursue my career in Software Development.

My key characteristics are a strong work ethic, professionalism and I am very conscientious. I pride myself in challenging work that produces good outcomes and results.

During my Grade 10 year as a student at High School Strand, I had the opportunity to travel alongside eleven other scholars to London and Europe where I was an exchange student at the Roeselare Exchange Scheme. During my stay in Europe, we were connecting with various groups of people in London, Paris and in Belgium. It was a very insightful experience, and I learned about connecting with people around the world.

WORK EXPERIENCE

- The Mom and Baby House 2024 - Present
